DECLARATION BY GROUP MEMBERS

I hereby declare that this mini project work entitled “Truck Trek Expert” has been prepared by Team mates under the guidance of Mrs.Gurpreet kaur (technical trainer), Department of Computer Science and Technology , GLA university, Mathura

I declare that this project is the done by Team mates.

Date:19-04-2023

ACKNOWLEDGEMENT

It gives us a great sense of pleasure to present the synopsis of the B.Tech mini project undertaken during B.Tech III Year. This project is going to be an acknowledgement to the inspiration, drive and technical assistance will be contributed to it by many individuals. We owe special debt of gratitude to Mrs.Gurpreet Kaur, Technical Trainer , for providing us with an encouraging platform to develop this project, which thus helped us in shaping our abilities towards a constructive goal and for his constant support and guidance to our work.

His sincerity, thoroughness and perseverance has been a constant source of inspiration for us. We believe that he will shower us with all his extensively experienced ideas and insightful comments at different stages of the project & also taught us about the latest industry-oriented technologies. We also do not like miss the opportunity to acknowledge the contribution of all faculty members of the department for their kind guidance and co-operation.

ABSTRACT

Movers and Packers is a project which is developed to provide an interactive platform between clients and packers and Movers Company. This project provides best and reliable services in relocating. Clients can book the services through this web portal. This Project provides useful information to clients in the process of relocating their house. Packers and movers agency works according to the needs and requirement of the customers and provide them the desirable results. The packers and movers agencies use best quality packing materials to pack our goods in such a way that all goods remain in safe condition during transit & move services ensure the safe delivery of our goods at our destination.

INTRODUCTION

About the Project:-

The Packers Movers (trucktrekexpert.com) is one of the India's leading reputed online moving companies booking platforms that started its journey in 1999 with an objective to make the search for dependable packers and movers in India a hassle-free one for the people. This website is a resourceful online database where people can find a list of packer and mover service providers available in Mumbai, Delhi NCR, Bangalore, Hyderabad, and other big and small cities.

Ever since its inception, thepackersmovers.com has stood by the people to help them find a good and reliable moving company for their moves right within their budget. This website is no less than an interface where people and moving companies can connect with each other and get a good deal at cost-effective prices on the foundation of trust. The movers and packers companies listed here offer a customized range of relocation services for the safe movement of household and corporate goods.

We at thepackersmovers.com is a one-stop destination to meet all your shifting needs relating to household, commercial or vehicle relocation. As we commit a safe, secure, and a hassle-free relocation experience, we have associated with the best and professional relocation service providers across India with good years of experience in the logistics sector. Every packing and moving company listed on our website is verified and thoroughly background checked before their profiles are shared with people.

Primary Reason to Choose This Project:-

Primary reason to choose this project is to If we want to fully understand the problem of truckers and customers in society while they search for truck in market area this website provide them convinient way to book truck and its drivers on its own.

The Main Objective of the Project:-

Customer satisfaction

When it comes to your website and online presence, great customer service is just one piece of the shopper experience. Taking into account your website and how easy it is for people to find products, the speed of page load time, and the overall design all play a significant role in the experience your shoppers have with your business.

These days the human attention span is hovering around 7 seconds. We're constantly being lured by distracting text messages, app notifications, or the need to check the latest news alert. Your business is competing with a lot of noise and you might only get one chance at capturing a customer. Having an effective strategy for improving customer satisfaction on your website is a major retailer recommendation and making sure the experience is the best is a critical goal. It's true that 88% of online consumers say they are less likely to return to a website after a bad experience.

Realistic and clear

The main goal of our website is clear that we are a gateway between customers and truck drivers who find it difficult to seek each other before this web site but after this they can easily find each other.

Working Methodology Of the Project:-

You can easily go through to our website with the help of internet when the main pages opens it shows all the available trucks and its drivers and we can easily select any of these and then city from source to destination and ur booking will done.

Hardware Requirements

Processor	1.6 GHz or Faster Processor
RAM	8 GB
Disk Space	10 GB of Available Hard Disk
Graphic	DirectX 9-Capable Video Card
Display	1024 X 768 or Higher Resolution

Software Requirement

Operating System	Windows 10, 11
Technology used	PHP,MySQL
Code Editor	Visual Studio Code
Database	Xampp
Web Browser	Brave

Conclusion

When it comes to starting a truck company, which is highly labour oriented business, you may have to be a good people manager. Every truck driver thinks of owning his truck than driving some one else's truck. As finance companies offer attractive loans, it has become easier for a common man to own a truck. So your first hurdle starts with hiring drivers. That too good drivers.

Next, building a network of franchise who can offer you regular business. Ideally your truck should be running on the road each and every hour to get the maximum return. Hence you may hire two drivers who work in shifts moving the goods faster and efficiently.

Maintenance of these trucks can be major challenges as mechanical parts can fail any time, if it is not replaced on time. Also, keep replenishing consumables like Tires, Battery, Oil and Diesel can take away much of your revenue, unless you monitor its best usage and leakage.

Having technology to support fleet movement and bookings is very important as well as monitoring each of those truck with GPS can help have real time data tracking the vehicle and delivery time estimate. Hence investing on technology is a must.
